PROBLEM STATEMENT

- Long wait times to book appointments

- Difficulty finding a doctor that matches specific criteria

PROPOSED STATEMENT

- To address these challenges,we propose a doctor appointment MERN(Mongodb,Express,Node.js,React)app

- That enables patients to easily book appointments with their preferred doctors for a specific time slot and free

KEY FEATURES

- User login/Registratio
- Appointment based on specialization, experience ,fee, timing
- Appointment History
- Appointment approval by admin team
- Suggest alternative doctors ,if not available

On the basis:

     Specialization

     Experience

     Fee

     Timing

CONCLUSION

- Solution to the long wait times and difficulty in finding a doctor that matches specific criteria.

- The app offers value for patients by allowing them to easily book appointments with their preferred doctors and providing transparency in terms of availability ,fees, and qualification.

- For doctors ,if offers a platform to manage their schedules more efficiently.
